

Mineflags are available with LED and also without LED.

All Mineflags are pre-sewn with a 285mm x 265mm mesh flag with a 50mm reflective silver cross, applied to both sides of the mesh flag, ensuring a fully visible vehicle.

The Mineflags are available in a variety of lengths - 1,200mm, 1,800mm, 2,400mm and 3,000mm.

All Mineflags poles are constructed with 13mm diameter fiberglass, and are built to survive off tough road vibrations and the harsh outback conditions.

ACCESSORIES INCLUDED

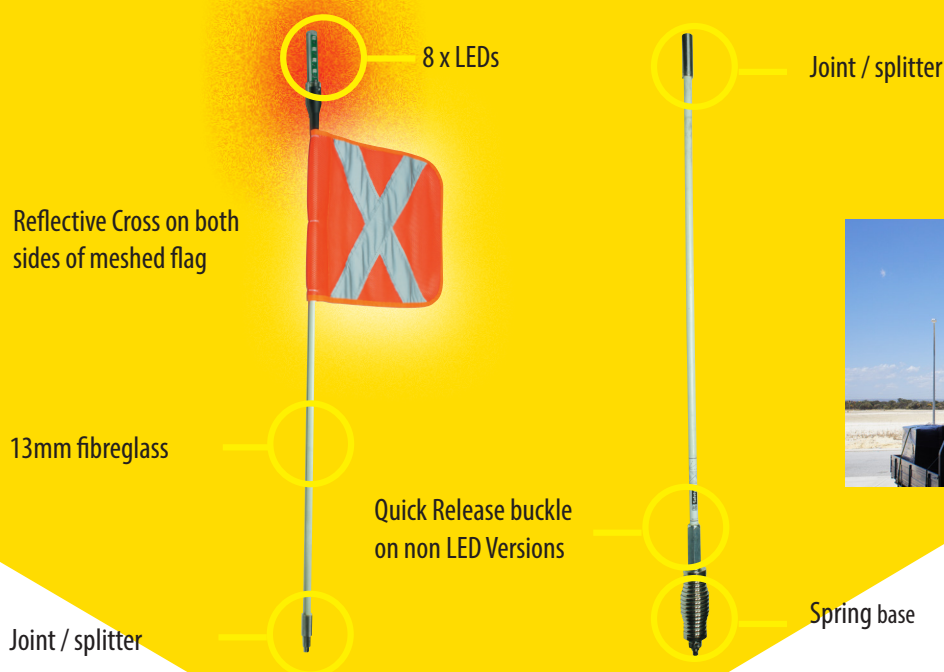

All Mineflags come with a range of accessories to ensure you are ready to assemble and ready to work.

For the non LED models, an optional Spring Base and a Quick Release is included in your pack. All mineflag lengths have a Joiner preassemble for ease of packing and transport.

In the LED models, a Spring Base is included. The Quick Release buckle is not available. For the longer 1800 and 2400 lengths, the mineflags are preassemble with a Splitter / Joint.

The LEDs used in the Mineflags are the durable, high intensity, 12V-24V variable DC, LED lights that emit a very bright spray of light. The custom designed and built LEDs will outshine superbright LEDs. The pulsating red flashing pattern can be seen at a full 360° angle, both horizontally and vertically. The visibility is over 1.5km at night and is ideal for mine vehicles, construction sites, off road buggies, anywhere that you need to be seen at night.

All the LED mineflags are C Tick compliant to ensure no interference with your communications equipment.

Bolt On base included

Joint / Splitter for easier storage

MFRS - OPTIONAL Replacement springbase (non LED)

MFRSL - OPTIONAL Replacement springbase (LED)

MINEFLAGS

MAGNETIC BASE

You can now use a magnetic base to hold the Mineflags. This is ideal if using a rental vehicle. It is ideal for use when you only need a temporary solution for getting on site.

The magnetic base is triangular with 3 super strong magnets. These have been road tested at over 120km/hr (using either 1200mm or 1800mm) and the mineflag and magnetic base holds.

The Mineflags are easy to assemble onto the magnetic base with pre drilled holes.

The magnets have a protective cover, reducing the risk of scratching your vehicle.

REPLACEMENT PARTS

Replacement flags, LEDs, Quick Release (male and female) and spring bases are readily available.

MFRF - Replacement mineflag

MFRQF - Replacement quick release female

MFRQM - Replacement quick release male

MFRL - Replacement LED (Red)
MFRLY - Replacement LED (Amber)

MFRS - Replacement springbase (non LED)

MFRSL - Replacement springbase (LED)

PRODUCT CODE	DESCRIPTION
MFMB	Triangular base with 3 strong magnets
MFRF	Replacement Flag
MFRL	Replacement LED Red
MFRLY	Replacement LED - Amber
MFRS	Replacement Spring Base (non LED)
MFRSL	Replacement Spring Base (LED)
MFRQM	Replacement Quick Release - Male
MFRQF	Replacement Quick Release - Female
